

BOEC Adaptive Ski and Snowboard Program COVID-19 Policy

Updated October 2022

Health Screening

Do not come to the BOEC if you are sick. You must arrive with no symptoms and maintain no symptoms for the duration of your ski/snowboard lessons. We may require a daily health screening while you are at the BOEC.

Vaccinations

We highly encourage vaccinations and boosters for all eligible participants however they are no longer required to participate in BOEC programs.

Testing

We will not be requiring any testing prior to attending BOEC programs, however this may change based on the prevalence of COVID-19. Please consider self-test before arriving at BOEC to reduce the spread of COVID-19.

Masks

BOEC is following the guidelines on masking set forth by CDC, State of Colorado, Summit County, and local mandates wherever we travel to. BOEC will uphold any agency's guidelines so long as they are not less rigorous than BOEC's or local mandates. Unvaccinated participants may be required to wear masks indoors or where fresh air and social distancing are not possible. If participants develop any symptoms such as a runny nose or sneezing, they may be required to wear a mask. Our requirements on masks may change based on the prevalence of COVID-19.

Social Distancing

We will be spending as much time as possible outdoors to allow for social distancing and fresh air. We may require masks outdoors if we are doing a lesson in which there is a sustained amount of time in close contact depending on the prevalence of COVID at the time of lessons.

Hygiene & Facility Cleaning

We will be encouraging good hand hygiene and overall cleanliness for the duration of the ski/snowboard lesson. There will also be frequent cleaning of adaptive equipment and ski office facilities.

The above guidelines were created based on the CDC recommendations for small and large gatherings (<https://www.cdc.gov/coronavirus/2019-ncov/your-health/gatherings.html>)
